REVIEWER INDEX

to Volume 97, January–April, 1981

Below is a list of the people who reviewed manuscripts for GENETICS during the preparation of Volume 97.

The aim of GENETICS is to communicate significant research. To succeed, we must recognize what is significant; we must make sure the presentation is accurate, unambiguous and yet readable. For this, we depend heavily on our reviewers, who perform this indispensible service without reward. The quality of the journal can be no better than the quality of their efforts. We apologize to any reviewer whose name has been inadvertently omitted, and we are sincerely grateful to all.

BAILLIE, D.
BIRD, R.
BRYANT, S.

CHAKRAVARTI, A.
CROW, J.
CURTSINGER, J.

DANIEL, W.
DENELL, R.
DOVE, W. F.

EANES, W. F.
EHRMAN, L.
ELLIOTT, R.
EPSTEIN, H. F.
ERREDE, B.

FRANCIS, D.

GIANOLA, D.
GIESEL, J. T.
GILLESPIE, J. H.
GINZBURG, L. R.
GOLD, J.
GRIFFITHS, A. J.
GROMKO, M.

SUBJECT INDEX

to Volume 97, January–March/April, 1981

ace-1 mutant, 261, 281
acetylcholinesterase mutants, 261, 281
alcohol dehydrogenase, 625
aldehyde dehydrogenase, 327
ascospore lethal mutant, 237

B chromosomes, maize, 379
bacteriophage T4, 1
barley, 165
behavioral isolation, 197, 217
β-glucoside metabolism, 11
bge operon, cryptic, 11

Caenorhabditis elegans, 65, 261, 281, 307
cell-division-cycle mutants, 551
centriole orientation, spermatids, 95
chromosome differentiation, wheat, 391
chromosome *19*, mouse, 327
clustering of genes, 363
computer simulation, 217
controlling element, 531
cytoplasmic isozyme, 327

density dependence, 679
density-dependent population growth, 667
differential viabilities, 415
DNA polymorphism, 145
DNA repair, 607
dominance, 639
dosage compensation, 625
Drosophila, 703
Drosophila melanogaster, 85, 95, 173, 187, 415, 563, 581, 607, 667, 719
Drosophila pseudoobscura, 679, 719
Drosophila subobscura, 429

effective population number, 731
ejaculate competition, 85
electrophoresis, 113
endomitosis, 551
enzyme polymorphism, 679
enzyme systems, 639
Escherichia coli K12, 11
esterase-6, 85
evolution, 679
evolution of mitochondrial DNA, 125

fitness, 639
fitness components, heritability of, 173, 187
frequency dependence, 679
fitness estimation, 667
fitness, male reproductive component, 719

galactose, 27
gene expression, regulation in phage T4, 1
gene family, 353
genetic variability, 457
genetic variances, 165
genotype-environment interaction, 443
growth rate, 443

haploids, 165
hidden variability, 429
homothallism, 531
homozygosity, 731
house mouse (*Mus musculus*), 327, 337
hybrid dysgenesis, *MR*, 95

IMP1, 27
inbreeding, 731
intraspecific mitochondrial DNA polymorphisms, 125

kinetic structure, 639

lethal mutations, 65
life-history, quantitative genetics of, 173, 187
linkage disequilibrium, 429

maize, 363, 379, 625
male recombination system, 95
mating behavior, 703
mating type, 513
mating-type differentiation, 531
meiosis, 45
meiotic mutant, 563
Minute mutation, temperature-sensitive, 581
mitochondrial, 27
mitochondrial DNA and evolution, 125
mitochondrial DNA polymorphism, 125
mot gene, phage T4, 1
mouse, 113, 327
mouse, new *W* alleles, 337
mouse, *W*, a pleiotropic gene, 337
multiallelic locus, 475
mutagen sensitivity, 607
mutations, 113

nematodes, 307
Neurospora, 237
Neurospora crassa, 247
nondisjunction, 607
nondisjunction, *B* chromosome, 379
nucleomorph, 145
nucleon, 145
nucleotide diversity, 145

pattern defects, ts Minute mutation, 581
Physarum polycephalum, 513
pigmentation, effect of *W* alleles, 337
plant breeding, 165
pleiotropy in the mouse, 337
ploidy, 551
polymorphism, 415
poultry, 443
premating isolation, 197, 217
promoter, utilization in phage T4, 1
protein degradation, 45
proteinase deficiency, 45
Pseudomonas aeruginosa, 495

random drift, 731
Rattus norvegicus, 125
Rattus rattus, 125
recombination values, 165
ref(2)P locus, 415
regulatory protein, 11
reproductive isolation, 197, 217
restriction analysis, mitochondrial DNA, 125
restriction enzymes, 145

Saccharomyces cerevisiae, 27, 45, 551
segregation distorter, 563
segregation distortion, mechanism of, 95
selection, 443, 679
selection on Drosophila life-history, 187
senescence, evolution of, 173, 187
sexual isolation, 703
speciation in Drosophila, 703
speciation models, 197
sperm displacement, 85
spermiogenesis in *MR* strain, 95
sib analysis, Drosophila life history, 173
spore killer mutation, 237
sporulation, 45
sterile mutations, 65
suppression, 65
suppressors, informational, 307
suppressors, of *rII* in phage T4, 1

temperature-sensitive Minute mutation, 581
Tn1, transposition of, 495
transposition, 531
Triticum aestinum, 391

viability systems, 475
virility component of fitness, 719

Wallace effect, 197, 217
wheat, 391

X-linkage, 731

yeast, 531

zein genes, 363
zygote formation, control of, 513
